Advanced Information Technology Public Company Limited was founded in 1992 in Thailand. The past 15 years has seen the company continuously develop from its initial status of IT distributor and has seen it progress towards the Company's corporate goal of being recognized as the leading system integrator throughout Thailand and regionally across South East Asia.

**YOUR
SUCCESS**
is our success

AIT offers system integration ICT services with a range of management and technical skills in order to make information widely accessible. AIT will help protect an organization's investment in hardware, software and training and enable it to fully realise the technological and business potential of its IT systems.

AIT has successfully built and maintained some of the most challenging information systems in Thailand for major industries and has considerable domain knowledge in the areas of Government and telecommunications. We are able to operate as the prime contractor, consortium member, subcontractor, or a discrete project manager - according to the needs of the project.

- multi-vendor skilled people with a mix of core competencies
- a broad portfolio of internationally and regionally recognized brand products
- key strategic partnerships and alliances
- exceptional financial capabilities
- broad experience in managing projects from large to small
- proven ability to minimize technical, operational and financial risks in complex projects
- a strong local and regional presence, which enables the company to monitor and analyze market information and to flexibly approach a client's needs.
